Helpful Hints...

Some questions have more answers than can be shown in one screen (For example, the catalog page of available unit sizes.) Use the scroll bars in the answer window to view all of the available answers.

A more convenient method is to hold down the right mouse button over the answer window and drag the contents of the answer window into view.

You can also use the arrow keys on your keyboard to move the selection rectangle within the list of possible answers. If you are using the keyboard, you can press the Spacebar to make your selection.
